

SPECIAL PROJECTS TEAM OVERVIEW

SPECIAL PROJECTS TEAM

Trusted support for complex operations

Operational planning and security resources for demanding assignments.

THE ARMA APPROACH

Some situations require a more focused level of planning, personnel, and coordination. Our Special Projects Team supports complex security assignments with an approach tailored to the risk, location, and operational objective.

From short-term deployments and special events to high-risk patrols and incident support, the team provides an attentive presence and clear operational focus. Each engagement starts with an understanding of the environment and the support required.

A clear plan for complex assignments.

Specialized security support for sensitive, high-priority assignments that demand detailed planning and disciplined execution.

HOW WE OPERATE

01

Define the assignment

We establish the objective, location, timeline, and operational constraints with you.

02

Prepare the deployment

Before deployment, we establish a focused operational plan based on the assessed risks, aligning personnel, resources, and on-site procedures with the requirements of the assignment.

03

Maintain operational clarity

Clear updates and a review of changing conditions keep the assignment focused.

OUR CAPABILITIES

Specialized resources. Complex assignments.

Operational planning and security resources for demanding assignments.

— Assignment-Specific Security

Security plans developed for assignments that fall outside routine operations. We define the scope, assess exposure, and coordinate personnel and resources around the location, objectives, and duration of the deployment.

— Site Risk & Vulnerability Assessments

A structured review of site access, physical vulnerabilities, and existing security measures. Findings establish operational priorities and inform practical steps to strengthen protection.

— Temporary Security Deployments

Additional security personnel for defined operational periods, changing requirements, and temporary assignments. Deployment plans establish responsibilities, reporting, and coordination with your existing arrangements.

— High-Risk Patrol Operations

Patrol coverage planned around assessed threats, vulnerable areas, and site conditions. Defined routes, observation, and reporting support early identification of concerns and a coordinated response.

— Event Security & Protective Planning

Security planning and personnel for private and corporate events. Venue conditions, access requirements, guest profiles, and event schedules inform the approach from preparation through completion.

— Mobile Security & Response

Mobile personnel support site coverage and developing operational requirements. Communication, escalation, and response arrangements are established around the assignment and coordinated as conditions change.

PLANNED AROUND YOUR REQUIREMENTS

Speak with our team about your priorities, risk exposure, and the support your assignment requires.

SPEAK WITH OUR TEAM

Every protection plan starts with a conversation.

Speak with our team about your priorities, risk exposure, and the support your assignment requires.

Discuss your requirements.
